### ABOUT ME

Skilled Second year student in computer science at CESI Exia engineering school. Programming Analyst. Currently focusing on web app development using the MEAN Stack, and mobile app development with Flutter.

### EXPERIENCE ET EDUCATION

- More than a dozen successful school projects in different areas (Software Architecture / Robotics / Database Administration / Network Architecture / Server Maintenance) where i had to use different technologies (For network, Servers, Packet Tracer for architecture..) and programming languages such as (Java,C,Python, SQL)
- Experience as a Freelance in Back-End web developpement
- Certifications CISCO level 1 & 2
- 3-month internship at the advertising and public relations consulting company TBWA / DJAZ

### PERSONAL PROJECTS

- Quizz Game web App. made it with NodeJS,ExpressJs, and MySQL for the database. Also had to implement web Sockets, and basic Front-end technologies.
- E-Commerce website for a Book Store, made with Laravel (php) was really a good experience because of the amount of libraries i had to use and all the mistakes i've been passing through
- Mini fridge App. Made with flutter, it is a mobile app to control a Fridge made with arduino, so i had to connect it with a bluetooth module and create a cool UI to control the temperature, humidity and give alerts..

### TECHNICAL SKILLS

- Back-End web developpement (Python-Flask/ Node Js- Express Js/ Php-Laravel/Ajax)
- Front-End web developement (HTML5 Bootstrap/CSS3/Javascript/Jquery)
- Software Developement (Java)
- Database Administration (MySQL/ Access)
- Mobile app developement (Flutter framework)
- Network Services and Protocols Maintenance (Linux / Apache / Bind9)Excellente capacité de travail en groupe & d'adaptation
- Good English & very good French & Arabic
